To all concerned,

I have been an A.A.H.A. practice owner for the past 18 years until my retirement in November of 2007. It has always been my goal to practice the highest standard of care available and ultrasound has been at the top of the list.

Like many practitioners, I was very interested in purchasing my own ultrasound machine after taking the appropriate courses. I immediately realized that to gain the experience to become truly competent it would become a full time job. This was very impractical with having to run a very busy practice, as all business owners realize.

Ultrasound imaging is such an indispensable tool in the hands of an experienced person. All of us have heard the multitude of reasons for doing ultrasounds. There is no reason why any of us should not be providing this need in our practices. I chose to use the services of a mobile ultrasound imaging company because I want the best for my patients. I could not match the quality of their ultrasound machines or their experience in performing diagnostic ultrasound imaging.

Dr. Marty Henderson has been performing our ultrasounds for over 5 years and has never disappointed me. He has an excellent knowledge base in medicine and relates this with his ultrasound findings. On a number of occasions when we sent patients to a specialist based on Dr. Henderson's recommendations, none of his work was ever disputed. Dr. Henderson is a dedicated and caring veterinarian who has a high standard of practicing medicine.

I strongly recommend anyone to use his services and know first hand that it will only enhance your practice standards of care as well as the bottom line. Please feel free to contact me regarding any questions you may have.

Sincerely,

Eugene Cannarella, DVM
