**Saturday**

8:00 am - 1:00 pm

**Closed Sunday**

July 27, 2008

Dear Fellow Veterinarian,

I would like to strongly recommend the mobile ultrasound services of Dr Martin Henderson. Dr Henderson, through Vetimage, has been providing ultrasound services to myself and my 4 associate veterinarians since 2003. The Animal House is a well established 12 year old small animal and exotic veterinary hospital which prides itself in the quality of the care and medicine we provide to our patients and clients. Abdominal and cardiac ultrasound and ultrasound-guided biopsy are considered extremely valuable tools in working up our cases. In many situations, ultrasound has been the only modality to actually provide the ultimate diagnosis. Although we own our own ultrasound unit, there is no substitute for the expertise of an experienced and well-educated ultrasonologist.

Dr Henderson is a dedicated and very conscientious ultrasonologist. In addition to his ultrasound proficiency, Dr Henderson is a good diagnostician and will often offer valuable diagnostic and therapeutic advice. His exams and written reports are always thorough and professional. I personally find our discussions during and/or after the ultrasound study to be the most helpful. Dr Henderson has a very collegial attitude and is more than happy to demonstrate his findings during the exam, if a doctor chooses to be present, although he is more than capable of doing several ultrasound exams with only technician support (on those wild and crazy days). Since veterinary caseloads can be unpredictable, it has always provided peace of mind that Dr Henderson usually can fit us into his schedule within a day or two of our call.

On a more personal note, Dr Henderson has always behaved very professionally and has demonstrated numerous times his dedication to our profession through the very current, cutting edge knowledge that he brings to the hospital. He has always treated my staff and our patients with care and consideration.

Dr Henderson and his services will be sorely missed at my hospital. Please feel free to contact me to discuss how his services could benefit your hospital as much as they have benefited mine.

Sincerely,

Sylvia V. Domotor DVM
