To Whom It May Concern:

Dr. Marty Henderson will definitely be missed at our clinic, All Creatures Veterinary Care. His calm, level-headed, ever-prepared persona was much appreciated.

His ultrasound skills and clinical interpretations were most helpful to both our clients and our clinicians. He saved several animals and their owners from ex-laps with his in depth interpretations on abdominal ultrasound exams. Whereas my ultrasound skills might be adequate, Dr. Henderson was always my go to man when there was any doubt, and, as most of you know, doubt can certainly creep in when over- or under-interpreting an ultrasound study.

We are a 3.5 doctor practice, with Tuesdays and Fridays our ultrasound days. We were able to save our clients long distance referral clinic travel and intervene surgically in a timely fashion. Our clients were thankful for our more complete capabilities, and Dr. Henderson's ultrasound was extremely instrumental in providing that level of care.

Echocardiography was one of Dr. Henderson's strong points, and his clinical acumen was an additional benefit to his echo skills. He will be an asset to any practice. Call me anytime.

Sincerely,

Kevin M. Fenton, D.V.M.  
Medical Director
