To Whom It May Concern:

My veterinary clinic has been in operation since 1993. I have approximately 4000 clients and am a sole practitioner. When mobile ultrasound became available we were delighted to offer it to our clients. There are many clients that appreciate the convenience and value of this service. Time is at a premium for many owners and travel any distance is impossible for some. This service has allowed me to help owners make more complete decisions regarding the best treatments for their pets.

Dr. Henderson is a completely reliable and knowledgeable doctor. He is careful in his work, checking all possibilities. I have always been able to rely on his ultrasound abilities. His recommendations regarding each case have been helpful. He is extremely kind and gentle with all of my patients. We have always been pleased to welcome him into the clinic.

If there are any questions, feel free to contact me at the above address or phone number.

Sincerely,

Nancy Modglin, D.V.M.
