

July 21, 2008

Dear Colleagues,

I had the pleasure of working with Dr. Henderson in Southern California before he decided to join me in the great state of Texas!

I have worked with many specialists - Board Certified Radiologists, Board Certified Internal Medicine Specialists, and human sonographers. Dr. Henderson's sonographic skills are consistently excellent. His assistance in case management proved invaluable to me as a Board Certified Feline Specialist.

Dr. Henderson's work ethic is second to none. Dr. Henderson always made time available and an extra effort to see a critical patient. He allowed me to provide the best patient care, right in my own clinic, where my clients felt safe and well cared for.

Sincerely,

Rachel
